

Virginia Premier 2015 Abridged Formulary

PLEASE NOTE: The symbol * next to a drug signifies that it is subject to nonformulary status when a generic is available throughout the year. Check your benefit materials for the specific drugs covered and the copayments for your prescription-drug program. For specific questions about your coverage, please call the phone number printed on your ID card.

The following is a list of the most commonly-prescribed drugs. It represents an abbreviated version of the drug list (formulary) that is at the core of your prescription-drug benefit plan. **The list is not all-inclusive. This document is effective August 2015. THIS LIST IS SUBJECT TO CHANGE.**

See page 12 for examples of Nonformulary Medications with Selected Formulary Alternatives.

Key

BOLDED products are preferred.

[INJ] = Drug is available in injectable form only.

[ST] = Step Therapy may apply to some or all strengths of the drug.

Brand-name drugs are listed in CAPITAL letters. Generic drugs are listed in lower case letters.

For the member: Generic medications contain the same active ingredients as their corresponding brand-name medications, although they may look different in color or shape. They have been FDA-approved under strict standards.

For the physician: Please prescribe preferred products and allow generic substitutions when medically appropriate. Thank you.
